

Safety Review Brief: Atorvastatin

Important Disclaimer

This report is not medical advice. FAERS reports are spontaneous adverse event reports and do not establish causality. Flagged patterns should be interpreted only as signals for human pharmacovigilance review.

Data Windows

- Recent window: 2026-02-27 to 2026-05-28
- Baseline window: 2025-02-26 to 2026-02-26

Report Counts

- Recent FAERS reports: 1000
- Baseline FAERS reports: 1000

Flagged Reporting Signals

Reaction	Recent Count	Baseline Count	Ratio	Score	PubMed Evidence
eye irritation	62	5	12.40	51.37	none
eye pain	22	3	7.33	22.99	none
medication error	19	5	3.80	11.38	weak
vision blurred	20	6	3.33	10.15	none
somnolence	11	3	3.67	9.11	weak
psoriasis	11	3	3.67	9.11	moderate
urticaria	18	6	3.00	8.83	moderate

Reaction	Recent Count	Baseline Count	Ratio	Score	PubMed Evidence
chest discomfort	21	8	2.62	8.11	moderate
hyponatraemia	12	5	2.40	6.16	none
hospitalisation	10	5	2.00	4.80	moderate

Literature Evidence

eye irritation

- Evidence grade: none
- PubMed papers found: 0
- No PubMed papers found for this drug/reaction query.

eye pain

- Evidence grade: none
- PubMed papers found: 0
- No PubMed papers found for this drug/reaction query.

medication error

- Evidence grade: weak
- PubMed papers found: 1
- Drug utilization, prescription errors and potential drug–drug interactions: an experience in rural Sri Lanka. (2016 Jun 25) [PMID: 27342193]

vision blurred

- Evidence grade: none
- PubMed papers found: 0

- No PubMed papers found for this drug/reaction query.

somnolence

- Evidence grade: weak
- PubMed papers found: 1
- Efficacy and safety of atorvastatin 10 mg every other day in hypercholesterolemia. (2002 Mar) [PMID: 12117017]

psoriasis

- Evidence grade: moderate
- PubMed papers found: 3
- Atorvastatin attenuates the expression of damage-associated molecular patterns and inflammatory cytokines in patients with psoriasis. (2025 Jun) [PMID: 40085417]
- Coproporphyrin-I as a Selective OATP1B Biomarker Can Be Used to Delineate the Mechanisms of Complex Drug-Drug Interactions: Cediogant Case Study. (2024 Nov) [PMID: 39102854]
- The exacerbating effect of atorvastatin on psoriasis. (2022 Aug) [PMID: 35644872]

urticaria

- Evidence grade: moderate
- PubMed papers found: 3
- Kounis Syndrome Secondary to Medicine-Induced Hypersensitivity. (2021) [PMID: 34630571]
- Role of Atorvastatin in Treatment of Chronic Spontaneous Urticaria Patients: A Controlled Clinical Trial. (2018 Jun) [PMID: 30600956]
- A case of atorvastatin-induced solar urticaria. (2016 Sep) [PMID: 27499245]

chest discomfort

- Evidence grade: moderate

- PubMed papers found: 3
- Ecstasy-Induced Acute Myocardial Infarction Unraveled by Multimodality Imaging. (2025 Jun) [PMID: 40718335]
- Multiple Anomalous Coronary Arteries With Right Sinus of Valsalva Origin: A Case Report. (2024) [PMID: 38966496]
- False positive technetium-99m pyrophosphate scintigraphy in a patient with cardiac amyloidosis light chain: Case report. (2021 Apr 30) [PMID: 33907108]

hyponatraemia

- Evidence grade: none
- PubMed papers found: 0
- No PubMed papers found for this drug/reaction query.

hospitalisation

- Evidence grade: moderate
- PubMed papers found: 3
- Lipid-Lowering Treatment and the Lipid Goals Attainment in Patients with a Very High Cardiovascular Risk. (2023 Aug 2) [PMID: 37623342]
- Statins for extension of disability-free survival and primary prevention of cardiovascular events among older people: protocol for a randomised controlled trial in primary care (STAREE trial). (2023 Apr 3) [PMID: 37012015]
- Associated factors for discontinuation of statin use one year after discharge in patients with acute coronary syndrome in China. (2022 Sep 14) [PMID: 36104136]

Limitations

- FAERS reports are spontaneous adverse event reports and do not establish causality.
- Report counts are not incidence rates and cannot estimate patient risk.

- Reporting patterns may be affected by duplicate reports, media attention, stimulated reporting, missing data, and reporting bias.
- Flagged patterns should be treated as signals for human pharmacovigilance review.
