

PharmaFind AI Product Workflow

From one drug name to a grounded safety-review brief with FAERS statistics, PubMed RAG, and PMID-validated citations.

Two ways to start

Use the deterministic dashboard or ask the agentic chat. Both call the same review tools.

Why this matters

The LLM is not the signal detector. Statistics come from deterministic FAERS counts, and literature synthesis is grounded in retrieved PubMed abstracts with PMID validation.

PRR/ROR stats

PubMed RAG

PMID citations
